

ELIZABETH LOFTS ELECTRIC VEHICLE CHARGING OUTLETS

1. If you wish to install an electrical outlet at your parking space to charge your vehicle, please submit a Step 1 Architectural Review Application. Your Application may be left with the Concierge for review by the Architectural Review Committee (ARC).
2. The ARC will then provide you with the contact information of authorized vendors who will be able to prepare a proposal outlining the cost of the outlet installation.
3. Once you have received the proposal, please submit a Step 2 Architectural Review Application to the ARC, along with a copy of the vendor proposal.
4. Once your Application is approved, you may schedule the work with the authorized vendor and proceed with the installation.
5. Once the installation is complete, please ask the Concierge to schedule a "walk-through" inspection by the Elizabeth Lofts Building Maintenance Coordinator.
